Dorgard

We've opened the door
to safer buildings

Wedging open fire doors is dangerous. Dorgard provides a wireless solution for legally holding open fire doors in any position, automatically closing the door when the fire alarm sounds.

Benefits

Keeps fire doors
open

Wire-free technology – no costly
hard wiring required!

Enables greater access
throughout the building

Improves ventilation within
a building

Meets all regulatory
requirements

Installed easily in under
5 minutes

For more information call Train2Protect today 01634 780502

Dorgard

Dorgard enables you to legally and safely keep fire doors open by allowing the door to close when the fire alarm sounds, preventing the spread of fire and smoke.

Installed onto the bottom of the fire door in under 5 minutes, Dorgard is listening for a continuous fire alarm of 14 seconds or more.

Dorgard also uses a radio transmitter for loud and busy environments

“ We have found the perfect solution for our fire doors with Dorgard. It does the job and swiftly closes our doors at the sound of the fire alarm. It's a reliable and easy product.”

Alex Dixon – Call Centre Manager

“ It's amazing to think how much we rely on our Dorgards but you don't even notice they're there. You just put them on your door and forget about them. ”

Stella Walsh – Headteacher

Freedor

Makes opening heavy doors effortless

Freedor is a unique wireless solution that allows fire doors to be left in any position and automatically closes the door when the fire alarm sounds. It makes heavy fire doors effortless to open, enabling greater access.

Benefits

Keeps fire doors open at any angle

Wire-free technology – no costly hard wiring required!

Enables greater access throughout the building

Reduces risk of injury

No more struggling with heavy fire doors

Meets all regulatory requirements

For more information call Train2Protect today 01634 780503

Freedor

Freedor is a unique wireless device installed at the top of a fire door that allows the door to swing freely, and be left in any position, but will close the door when the fire alarm sounds.

Freedor needs to hear a fire alarm verifying the sound over a 14-second period. Freedor will then close the door, preventing the spread of fire and smoke throughout the building.

The free-swing mode removes all resistance from heavy fire doors making them easier to operate

“ Freedor is a great product for us. It’s easy to install and the majority of the properties we work on can really benefit by having these. Every time I see a wedged open fire door I think Freedor. ”

Bob Hemsley – Installer

“ The residents love our new Freedors. They take the weight out of the fire doors so the residents don’t need to ask for help to get through the doors. It’s given everybody freedom, which isn’t something you’d expect to say about a fire safety product. ”

Adam McDonald – Care Home Owner
